

## **Table A – Results of Internal Review Committee**

Date of Review/Recommendation: May 31, 2006

Water Body Under Evaluation:

Identification #: 2693  
Name: Barn Hollow (C)  
Length of Segment: 8.0 miles  
County (ies): Texas & Howell

Use Attainability Analysis Study:

Identification #: 1145  
Submitter: DNR Staff - D. Meinert  
Date(s) Conducted: June 23, 2005  
Date Received: July 18, 2005  
Use Evaluated: Whole Body Contact Recreation (WBCR)

UAA Completeness Check:

All Required Information Included?	<input checked="" type="checkbox"/> Yes	<input type="checkbox"/> No
Correct Forms Used?	<input checked="" type="checkbox"/> Yes	<input type="checkbox"/> No
Forms Signed and Dated?	<input checked="" type="checkbox"/> Yes	<input type="checkbox"/> No
Comments:		

UAA Criteria Evaluated:

- ☐ 1-Natural Pollutant Sources.
- ☒ 2-Natural, Ephemeral, Intermittent or Low-Flow Condition.
- ☐ 3-Non-Remedial, Human Caused Condition.
- ☐ 4-Hydrologic Modifications.
- ☐ 5-Natural Physical Features.
- ☐ 6-Substantial, Widespread Social and Economic Impact.

Use Determination & Recommendation:

Has the use existed since November 28, 1975? ☐ Yes ☐ No ☒ Unknown  
Comments: Three interviews were conducted.

Is the evaluated use attainable? ☒ Yes, below site #5 ☒ No, above site #5

Comments: The UAA was conducted in June 2005 and no WBCR was observed. The stream was dry at the first three sites and shallow at site #4; however, the stream met the maximum depth and average depth criteria at site # 6. Due to different conditions and the length of the stream, the committee recommends modifying the use by retaining the WBCR designation below site #5, and removing the use upstream of site #5.

**Committee Recommendation:** ☐ Retain Use ☒ Modify Use ☐ Remove Use ☐ Inconclusive

Committee Members: Mary Clark, Mark Osborn, Anne Peery
